

## Lightweight-Container

We can create customised container sizes to meet your technical requirements. Sandwich constructed material provides high strength while being lightweighted.

All functional items like closure fasteners, valves and eyes are recessed in the container structure. You can choose between different holding systems. Cushioning or shock mounts can be applied for.

### **Development, production, calculation and testing of retaining systems for the protection of your equipment.**

Development of cushioning and retaining systems tailored to protect the items of supply.

Production of PE moulded foams and soft foams.

### **Our comprehensive programme offers you the complete solution for your needs:**

From the development of your product, to the prototype up to the final production.

Maibach is a reliable and capable partner for all packaging solutions.

Our experienced and qualified engineering and design team is always accustomed to finding a solution for the most difficult and demanding packaging challenge.

We look forward to hearing from you.
